

Tail Waggers

By Elysa Cooper

When it comes to car safety for your dog, there are a lot of options out there. Some are more expensive than others, and some are more comfortable than others. But the Kurgo Auto Zip Line with Harness is a great option for those who want to keep their dog safe while also allowing them to move around in the car.

How it works

The Kurgo Auto Zip Line with Harness is a simple and effective way to keep your dog safe in the car. It consists of a nylon webbing line that attaches to the two rear passenger side handles of the car. A leash is attached to the end of the line, and the Kurgo safety harness is attached to the other end of the leash.

Kurgo Auto Zip Line with Harness

For those of us who struggle with safety versus comfort for our dogs while riding in the car, Kurgo has come up with an innovative solution. The Auto Zip Line with Harness allows your dog the freedom

to move around, while keeping him restrained. This system has a nylon webbing line that simply attaches between the two rear passenger side handles, creating a tether run that attaches with a leash to the Kurgo safety harness. The secured line allows your dog to move around the backseat while providing safety in case of sudden stops or accidents. The versatile safety harness can also be used with just a seat belt and also as a walking harness. Available in S-XL for every size dog.

Retail price: \$39.95 (includes the zip line, harness and leash/tether)
