

SKYBOX

# Booster Seat™

## Installation and care

### Key:

- a - Headrest Strap
- b - Headrest Strap Adjuster
- c - Headrest Strap Clips
- d - Seat Back Strap
- e - Harness Tether

### Parts List:

The Skybox Booster Seat package contains:

- (1) Removable fabric liner
- (1) Removable quilted seat pad
- (1) Adjustable headrest strap
- (1) U-shape steel support brace
- (1) Removable plastic bottom support
- (1) Skybox basket/frame

### BASIC SETUP:

1. Place bottom of U-shaped steel support brace into the bottom back of of the Skybox frame with the two ends facing up and toward the front at a 45° angle. (image 1)
2. Place ends of U-shape steel support through orange button holes at the top front of the Skybox frame, inside each of these holes is a plastic tube which the ends of the U-shape steel support fit into. (image 2 and 3)
3. Place the orange fabric liner into the Skybox frame and fold edge over. You will find three slits in the liner, one in the back that the Harness Tether pulls through and one on each side for the Headrest Strap.
4. Place reversible Quilted Seat Pad in the bottom.

## Installation and care

### INSTALLATION IN VEHICLE:

1. Clip Headrest Strap to Headrest Strap Clips on sides (image 4) of Skybox frame and loop over the top of the headrest. Use the Strap Adjuster to select a suitable height for your Skybox.
2. Wrap Seat back Strap around the back of the seat and clip buckles together. Pull strap to tighten. (image 5)
3. Clip Fido to the Skybox Tether, adjust length and you are ready to roll.

Image 4

### INSTALLATION IN VEHICLE WITHOUT HEADREST:

1. Clip Headrest Strap to Headrest Clips on sides of Skybox frame and loop over the top of the seat. Extend the length of the Headrest Strap so the bottom of Skybox Booster Seat rests on seat.
2. Wrap Seat back Strap around the back of the seat and clip buckles together. Pull strap to tighten.
3. Clip Fido to the Skybox Tether, adjust length and you are ready to roll.

Image 5

### WARNING:

After clipping the Skybox Tether Strap to a dog harness adjust the length of the strap to keep dog from jumping out. Always use a harness with the Skybox, (Kurgo Tru-Fit Smart Harness recommended) collars are not suitable for automotive restraint. Never leave a dog unattended in the vehicle.

### WASHING INSTRUCTIONS:

- Brush off loose dirt with a dry brush
- As needed, wipe off with a damp sponge and mild soap
- Rinse only, if possible. Use cold water and a sponge or rinse in a tub without soap
- Liner and quilted pad can be machine washed with a mild detergent and air dried
- Rinse thoroughly to eliminate soap residue.
- Lay flat to dry.
